ANGAD SRIVASTAV

Full Stack Developer | Software Engineer

+91-9057581263   srivastav.angad@gmail.com   linkedin.com/in/angad-srivastav   devangad.me

SKILLS

HTML, CSS, JavaScript, Typescript, React, Redux, Next.js, Micro frontends, Tailwind CSS, Motion, Node.js, NestJS, Express.js, MongoDB, MySQL

SUMMARY

Full-stack developer with 5 years of experience delivering scalable and high-performance web applications. Skilled in building modern front-end interfaces and robust back-end services using frameworks. Focused on writing clean, maintainable code and solving real-world problems with practical, user-centered solutions.

EXPERIENCE

Senior Software Engineer
05/2024 - Present

Nagarro

- Worked on multiple micro frontends and built one entirely from scratch within tight deadlines, delivering a scalable and high-quality frontend application.
- Reduced manual automation time for new record creation by 40% through process improvements and frontend optimizations.
- Identified and resolved performance bottlenecks on low-end devices by adopting various React optimization techniques without compromising user experience.
- Integrated the MFE seamlessly with other micro frontends in the ecosystem, ensuring smooth cross-application communication and user experience.
- Increased code coverage to 91% by writing comprehensive end-to-end tests covering all critical user flows.
- Improved database performance by creating indexes and optimizing queries, resulting in faster data retrieval and reduced server load.

Software Engineer L2
12/2021 - 05/2024

MakeO (Formerly Toothsi)

- Developed and maintained the cart page module for both customer-facing platforms and internal business tools, contributing to core e-commerce functionality.
- Built and optimized business critical APIs such as real-time agent tracking, package upgrades, and maintenance plans, ensuring high availability and scalability.
- Played a key role in migrating the application from Next.js v12 (Page Router) to Next.js v14 (App Router), resulting in better code structure,improved routing performance and better web vitals.
- Led performance optimizations by restructuring third-party script loading and leveraging Next.js GTM tags, improving Core Web Vitals and user experience.
- Wrote comprehensive end to end (e2e) test suites covering complete user journeys with automated error reporting via chat pipelines for quick issue resolution.
- Participated in a strategic migration of complex, performance-sensitive data from SQL to MongoDB, resulting in faster fetches and simplified data modeling for scale.

Software Engineer
08/2020 - 11/2021

Biz4Group

- Delivered complete full-stack solutions across multiple client projects in e-commerce, blogging, and service platforms using React, Node.js, Express.js, and MongoDB.
- Developed authentication and authorization flows using JWT, role-based access control, and session handling within Node.js backends.
- Integrated secure payment gateways (Stripe) and order management logic for e-commerce platforms.
- Engineered a custom version control system for a blogging platform, enabling draft management and rollback features.
- Collaborated with cross-functional teams to write scalable business logic and RESTful APIs for backend services.

EDUCATION

Bachelors of Computer Applications
Jaipur, Rajasthan

St. Xaviers College
01/2017 - 01/2020
